IN THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) An electronic device including an electronic display comprising a screen and circuitry for providing display data to the screen, wherein the circuitry is operable in at least two modes, a first mode in which display data is provided to the screen for viewing in a first orientation and a second mode in which display data is provided to the screen for viewing in a second, orthogonal, orientation, and wherein in the first mode the display data comprises a first image for display substantially filling the screen, and in the second mode the display data comprises second and third images for occupying different areas of the screen, wherein at least one of the second and third images has a different size than the first image.

2. (Currently Amended) A The device as claimed in claim 1,  
wherein the screen has an aspect ratio of approximately 16:9.

3. (Currently Amended) A The device as claimed in claim 1,  
wherein the screen has an aspect ratio of approximately 1.4:1.

4. (Currently Amended) A The device as claimed in any  
preceding claim, wherein the second and third images are provided  
one above the other and occupy substantially the full width of the  
screen in the second orientation..

5. (Currently Amended) A The device as claimed in any  
~~preceding claim 1~~, wherein the display screen is rotatable with  
respect to the device between the first and second orientations.

6. (Currently Amended) A method of displaying data on a screen  
comprising the acts of:

determining whether to display according to a first or second  
mode of operation;

when displaying in the first mode of operation, providing

display data comprising ~~an~~ a first image to substantially fill the screen in a first ~~orientation,~~ orientation; and

when displaying in the second mode of operation, providing display data comprising second and third images for occupying different areas of the screen in a second, orthogonal, orientation, wherein at least one of the second and third images has a different size than the first image.

7. (Currently Amended) ~~A~~ The method as claimed in claim 6, wherein the second and third images are provided one above the other and occupy substantially the full width of the screen in the second orientation.

8. (Currently Amended) ~~A~~ The method as claimed in claim 6 or 7, wherein the ~~step-act~~ of determining whether to display according to a first or second mode of operation is carried out automatically in dependence on the display data.

9. (Currently Amended) ~~A~~ The method as claimed in claim 6 or 7, wherein the ~~step-act~~ of determining whether to display according

to a first or second mode of operation comprises receiving an instruction from a user of the device.

10.(New) The device of claim 1, wherein at least one of the second and third images is reduced to substantially fill a width of the screen.

11.(New) The device of claim 1, wherein the second and third images have identical aspect ratios.

12.(New) The device of claim 1, wherein the second and third images are reduced to fill a width of the screen and have identical aspect ratios.
